

Maximo in Aviation IBM Software Suite

AviLinx: Authorized Representative for Pakistan

AviLinx proudly represents IBM's Maximo in Aviation software suite in Pakistan, offering end-to-end solutions for efficient, paperless, and intelligent aviation asset management.

Our Role

AviLinx promotes Maximo in Aviation to airlines, charter services, aerial operators, and private aviation clients in Pakistan. With strong industry expertise, we ensure smooth implementation and integration, offer ongoing technical support, and build lasting relationships. We also identify new opportunities to drive aviation's digital transformation through asset management and paperless solutions.

Key Capabilities

AviLinx delivers other customized intelligent asset management solutions designed specifically for aviation, enabling a smooth transition to a fully paperless environment. Maximo seamlessly integrates with maintenance, compliance, and operational workflows to enhance efficiency and ensure regulatory alignment.
